

Flow fields in Business Central AL

FlowFields aren't physical fields that are stored in the database. They're a description of a calculation and a location for the result to be displayed.

FlowField type	Field type	Description
Sum	Decimal, Integer, BigInteger, or Duration	The sum of a specified set in a column in a table.
Average	Decimal, Integer, BigInteger, or Duration	The average value of a specified set in a column in a table.
Exist	Boolean	Indicates whether any records exist in a specified set in a table.
Count	Integer	The number of records in a specified set in a table.
Min	Any	The minimum value in a column in a specified set in a table.
Max	Any	The maximum value in a column in a specified set in a table.
Lookup	Any	Looks up a value in a column in another table.
