String Functions

You can make use of string functions to work with strings, like text or code

AL supports number of string functions, but it also supports number of same functions that are available as .net string class

StrPos and IndexOf

CopyStr and SubString

SelectStr and Split

InStr

StrLen and MaxStrLen

LowerCase, UpperCase, ToLower, and ToUpper

IncStr

Other .net string functions

There are many string functions that are available which are in .net string class

Contains	Replace	TrimStart
EndsWith	Split	
IndexOf	StartsWith	
IndexOfAny	SubString	
LastIndexOf	ToLower	
PadLeft	ToUpper	
PadRIght	Trim	
Remove	TrimEnd
